BEGINNER COURSE

COURSE 1 OF 9

Computer Essentials

The computer skills every office job asks for.

10 weeks	3 × 2 h	60 h	Included
ESTIMATED DURATION	CLASSES PER WEEK	HANDS-ON CLASS TIME	INTERNSHIP + CERTIFICATE

WHAT YOU WILL LEARN

- ✓ Use Windows, files and folders confidently, and type at a useful speed.
- ✓ Write, format and print professional documents in Microsoft Word.
- ✓ Build spreadsheets with formulas, tables, charts and pivot tables in Excel.
- ✓ Design and deliver a clear presentation in PowerPoint.
- ✓ Work on shared files with Google Workspace and stay safe online.

TOOLS YOU WILL USE

Windows · Microsoft Word · Microsoft Excel · Microsoft PowerPoint · Google Workspace · Gmail / Outlook

WHO IT IS FOR

Students, job seekers, office staff and business owners. No computer experience needed.

BEFORE YOU START

None.

WHERE IT LEADS

Office assistant · Data entry operator · Administrator · Receptionist · Business owner who runs their own paperwork

Your course, step by step

8 MODULES · EVERY ONE HAS A HANDS-ON LAB

01 Computer and Windows basics — WK 1

Hardware and software, in plain words · The Windows desktop, settings and shortcuts · Files, folders, drives and USB storage

02 Typing and keyboard shortcuts — WK 2

Home-row touch typing and posture · Accuracy first, then speed · The 25 shortcuts that save the most time

03 Internet, email and online safety — WK 3

Browsers, tabs, bookmarks and downloads · Searching properly and judging sources · Creating and using a professional email account

04 Microsoft Word — WK 4–5

Typing, selecting and formatting text · Paragraphs, spacing, lists and indents · Styles and keeping a document consistent

05 Microsoft Excel — WK 6–7

Cells, rows, columns and formatting · Formulas and functions: SUM, AVERAGE, IF, COUNTIF, SUMIF · XLOOKUP and VLOOKUP for finding data

06 Microsoft PowerPoint — WK 8

Slide layouts and the slide master · Design rules: one idea per slide · Images, icons, charts and tables

07 Google Workspace — WK 9

Google Docs, Sheets and Slides · Sharing, comments and version history · Drive, folders and permissions

08 Capstone project — WK 10

Choose a real small-business scenario · Plan the documents, sheet and presentation you need · Build, review and revise

YOU FINISH WITH A REAL PROJECT

A complete office pack for a small business: a letter and CV set in Word, a price and sales sheet with formulas and a chart in Excel, and a ten-slide presentation.

INTERNSHIP **Office and data intern.** After the course, work with the team on real tasks, with feedback.

BEGINNER COURSE

COURSE 2 OF 9

Graphic Designing

A first full course in design.

14 weeks	3 × 2 h	84 h	Included
ESTIMATED DURATION	CLASSES PER WEEK	HANDS-ON CLASS TIME	INTERNSHIP + CERTIFICATE

WHAT YOU WILL LEARN

- ✓ Apply layout, hierarchy, colour and typography to any design.
- ✓ Edit and compose images in Photoshop.
- ✓ Draw logos and icons as vectors in Illustrator.
- ✓ Prepare print-ready files for a real press.
- ✓ Present a starter portfolio of three to five finished pieces.

TOOLS YOU WILL USE

Adobe Photoshop · Adobe Illustrator · Canva · A pen and sketchbook

WHO IT IS FOR

School and college students, press and shop staff moving into design, and anyone starting freelance design work. You do not need to draw.

BEFORE YOU START

None. You start from zero.

WHERE IT LEADS

Junior graphic designer · Social media designer · Print designer · Freelance designer

Your course, step by step

7 MODULES · EVERY ONE HAS A HANDS-ON LAB

01 Design foundations — WK 1-2

What a client brief is, and how to read one · Layout, grids and alignment · Visual hierarchy and focus

02 Colour and typography — WK 3-4

Colour theory: hue, saturation, brightness · Building a palette and checking contrast · Typeface families, weights and pairing

03 Photoshop essentials — WK 5-7

The interface, documents and resolution · Layers, masks and smart objects · Selections and cut-outs

04 Illustrator essentials — WK 8-10

Vector vs raster, and why it matters · The pen tool and shape builder · Paths, anchor points and curves

05 Canva and quick design — WK 11

Using templates properly, not copying them · Brand colours and fonts in Canva · Posts, banners and short presentations

06 Print basics — WK 12

Bleed, trim and safe margins · CMYK vs RGB · Resolution and file formats

07 Portfolio and capstone — WK 13-14

Choosing your strongest work · Writing a short case study for each · Presenting work to a client

YOU FINISH WITH A REAL PROJECT

A mini brand for a real local business: logo, visiting card, flyer and a three-post social media set, presented as a short case study.

INTERNSHIP **Design intern.** After the course, work with the team on real tasks, with feedback.

BEGINNER COURSE

COURSE 3 OF 9

Video Editing

From raw footage to finished videos people want to watch.

12 weeks	3 × 2 h	72 h	Included
ESTIMATED DURATION	CLASSES PER WEEK	HANDS-ON CLASS TIME	INTERNSHIP + CERTIFICATE

WHAT YOU WILL LEARN

- ✓ Edit a video from raw footage to a finished export.
- ✓ Clean up and mix audio, music and voiceover.
- ✓ Correct and grade colour so shots match.
- ✓ Add titles, captions and simple motion graphics.
- ✓ Deliver files in the right format for each platform.

TOOLS YOU WILL USE

Adobe Premiere Pro · DaVinci Resolve · CapCut · Adobe After Effects (basics)

WHO IT IS FOR

Students, content creators, shop owners and anyone starting freelance editing. No experience needed.

BEFORE YOU START

None. A mid-range laptop is enough to start.

WHERE IT LEADS

Video editor · Social media video editor · Content creator · Freelance editor

Your course, step by step

9 MODULES · EVERY ONE HAS A HANDS-ON LAB

01 Video fundamentals and workflow — WK 1

Frame rate, resolution and aspect ratio · Codecs and formats, in plain words · Organising footage and project files

02 Editing with Premiere Pro — WK 2–3

The interface, timeline and tools · Cutting, trimming and ripple edits · J-cuts, L-cuts and cutting on action

03 Audio — WK 4

Why audio matters more than picture · Cleaning voice: noise, hum and levels · Adding music and sound effects

04 Colour with DaVinci Resolve — WK 5–6

Reading scopes: waveform and histogram · Exposure and white balance correction · Primary grading: lift, gamma, gain

05 Titles, captions and motion — WK 7–8

Titles and lower thirds · Captions and subtitles · Keyframes and simple animation

06 Short-form video — WK 9

Reels, TikTok and Shorts: what each rewards · Vertical framing and safe zones · Hooks and holding attention

07 Business videos — WK 10

Product videos and promos · Ads with a clear offer and call to action · Event, wedding and highlight reels

08 Delivery and freelancing — WK 11

Export settings by platform · File size and quality trade-offs · Review rounds and client feedback

09 Capstone project — WK 12

Plan, shoot or collect footage · Edit, grade, sound and title · Export and present

YOU FINISH WITH A REAL PROJECT

A complete promotional video for a local business, with audio, colour, titles and captions, plus a 60-second showreel of your best work.

INTERNSHIP **Video editing intern.** After the course, work with the team on real tasks, with feedback.

COURSE 4 OF 9

Digital Marketing

How to get customers online and know what is working.

12 weeks	3 × 2 h	72 h	Included
ESTIMATED DURATION	CLASSES PER WEEK	HANDS-ON CLASS TIME	INTERNSHIP + CERTIFICATE

WHAT YOU WILL LEARN

- ✓ Plan a campaign around an audience, an offer and a budget.
- ✓ Create and schedule content for Facebook, Instagram and TikTok.
- ✓ Set up, run and optimise a Meta Ads campaign.
- ✓ Set up a Google Business Profile and understand search and SEO basics.
- ✓ Read analytics and report results to a client.

TOOLS YOU WILL USE

Meta Business Suite and Ads Manager · Google Business Profile · Google Analytics · Canva · WhatsApp Business · AI writing tools

WHO IT IS FOR

Shop and business owners, students entering marketing, and freelancers who want to run campaigns for clients.

BEFORE YOU START

None. Basic computer skills help.

WHERE IT LEADS

Digital marketer · Social media manager · Performance marketing assistant · Freelance marketer

Your course, step by step

9 MODULES · EVERY ONE HAS A HANDS-ON LAB

01 Marketing foundations — WK 1
Audience, offer and positioning · How customers decide to buy · Setting a goal and a budget

02 Social media strategy and content — WK 2–3
Choosing platforms for a business · Content pillars and a monthly calendar · Posts, carousels and short video

03 Copywriting and content — WK 4
Headlines, hooks and calls to action · Writing offers people understand · Product and service pages

04 Meta Ads — WK 5–6
Ad account, pixel and business setup · Campaign, ad set and ad structure · Objectives and audiences

05 Google: search, maps and SEO — WK 7–8
How search works and what people search for · Keyword research for local businesses · On-page SEO basics

06 WhatsApp marketing — WK 9
WhatsApp Business app, catalogue and labels · Quick replies and greeting messages · Broadcast lists, used respectfully

07 Analytics and reporting — WK 10
What to measure, and what to ignore · Google Analytics basics · Meta insights

08 Freelancing and agency work — WK 11
Finding your first clients · Proposals, pricing and contracts · Managing several accounts

09 Capstone: a live campaign — WK 12
Plan, build and launch · Optimise during the run · Report results

YOU FINISH WITH A REAL PROJECT

A complete campaign for a real business: plan, content, a live Meta Ads test, Google Business Profile setup, WhatsApp setup and a results report.

INTERNSHIP **Marketing intern.** After the course, work with the team on real tasks, with feedback.

COURSE 5 OF 9

AI Skills

Use AI properly in real work.

9 weeks	3 × 2 h	54 h	Included
ESTIMATED DURATION	CLASSES PER WEEK	HANDS-ON CLASS TIME	INTERNSHIP + CERTIFICATE

WHAT YOU WILL LEARN

- ✓ Explain what AI can and cannot do, and why it makes mistakes.
- ✓ Write clear prompts and check the results.
- ✓ Use AI for writing, research, design, documents and coding help.
- ✓ Build an automation that removes a repeated task.
- ✓ Build and test a small AI assistant for a business.

TOOLS YOU WILL USE

ChatGPT · Claude · Gemini · AI image and video tools · No-code automation tools · AI APIs

WHO IT IS FOR

Students, freelancers, office staff and business owners. The tools and prompting modules need no coding.

BEFORE YOU START

None for the first five weeks. The API module is easier with basic programming.

WHERE IT LEADS

- AI-skilled office professional
- Automation assistant
- Content and research assistant
- Freelancer offering AI-assisted services

Your course, step by step

7 MODULES · EVERY ONE HAS A HANDS-ON LAB

01 How AI models work — WK 1

What a language model is, in plain words · Training, tokens and context · What it does well and badly

02 Prompting that works — WK 2

Giving clear instructions · Context, examples and format · Roles, steps and constraints

03 AI tools for work — WK 3–4

Writing, editing and summarising · Research with sources you can check · Documents, slides and spreadsheets with AI

04 Automation — WK 5

Triggers and actions · Connecting forms, sheets, email and chat · Repeating tasks automatically

05 Building with AI APIs — WK 6–7

Calling a model from code · Messages, system prompts and settings · Handling responses and errors

06 An assistant for a business — WK 8

Choosing a real use case · Writing the instructions and limits · Testing with real questions

07 Capstone and responsible use — WK 9

Privacy of customer data · When not to trust AI · Telling clients honestly how AI was used

YOU FINISH WITH A REAL PROJECT

A small AI assistant and one automation for a real business use case, with a written note on its limits and how it should be used responsibly.

INTERNSHIP **AI intern.** After the course, work with the team on real tasks, with feedback.

COURSE 6 OF 9

Web Development

A complete frontend course.

16 weeks	3 × 2 h	96 h	Included
ESTIMATED DURATION	CLASSES PER WEEK	HANDS-ON CLASS TIME	INTERNSHIP + CERTIFICATE

WHAT YOU WILL LEARN

- ✓ Build a responsive website from a design, without a template.
- ✓ Write JavaScript that makes a page interactive and loads data from an API.
- ✓ Use Git and GitHub to save and share code.
- ✓ Make pages accessible, fast and usable on small phones.
- ✓ Deploy a site on a real domain.

TOOLS YOU WILL USE

HTML · CSS · JavaScript · Tailwind CSS · Git and GitHub · VS Code · Chrome DevTools

WHO IT IS FOR

Beginners who want to become frontend developers, students looking for a first tech skill, and owners who want to understand how their website is made.

BEFORE YOU START

None. You should be comfortable using a computer.

WHERE IT LEADS

Frontend developer (junior) · Website developer · Freelance web developer

Your course, step by step

9 MODULES · EVERY ONE HAS A HANDS-ON LAB

01 How the web works and your setup — WK 1

Browsers, servers, domains and DNS · What happens when a page loads · Setting up VS Code, Git and the terminal

02 HTML — WK 2–3

Document structure and semantic tags · Headings, text, lists, links and images · Forms and inputs

03 CSS — WK 4–6

Selectors, specificity and the cascade · The box model and layout · Flexbox and Grid

04 JavaScript fundamentals — WK 7–9

Variables, types and operators · Conditions and loops · Functions and scope

05 DOM, events and APIs — WK 10–11

Selecting and changing elements · Events and forms · Local storage

06 Git and GitHub — WK 12

Commits, branches and merging · Working with a remote repository · Pull requests and reviewing code

07 Tailwind CSS — WK 13

Utility-first styling · Responsive and state variants · Building reusable components

08 Accessibility, performance and deployment — WK 14

Keyboard use and screen-reader basics · Colour contrast · Image optimisation and loading

09 Capstone project — WK 15–16

Gather a real brief from a local business · Plan pages and content · Design, build and test

YOU FINISH WITH A REAL PROJECT

A complete, responsive, accessible website for a real local business, published on a live domain.

INTERNSHIP **Frontend intern.** After the course, work with the team on real tasks, with feedback.

ADVANCED COURSE

COURSE 7 OF 9

Advanced Graphic Designing

For designers who already work in Photoshop and Illustrator and want to work at a professional level: complete brand identities, packaging, editorial layouts and campaigns, delivered the way agencies deliver them.

20 weeks	3 × 2 h	120 h	Included
ESTIMATED DURATION	CLASSES PER WEEK	HANDS-ON CLASS TIME	INTERNSHIP + CERTIFICATE

WHAT YOU WILL LEARN

- ✓ Develop a complete brand identity from research to guidelines.
- ✓ Compose and retouch at a professional level.
- ✓ Lay out multi-page documents in InDesign.
- ✓ Design packaging from a dieline, ready for production.
- ✓ Run a design project from brief to delivery and price it.

TOOLS YOU WILL USE

Adobe Photoshop · Adobe Illustrator · Adobe InDesign · Figma

WHO IT IS FOR

Designers who finished our beginner course or can already work comfortably in Photoshop and Illustrator.

BEFORE YOU START

Comfortable with layers, masks and the pen tool. A portfolio of at least three pieces helps.

WHERE IT LEADS

Graphic designer · Brand designer · Packaging designer · Art director (junior) · Studio or freelance designer

Your course, step by step

9 MODULES · EVERY ONE HAS A HANDS-ON LAB

01 Brand strategy and identity — WK 1-3

Brand research: audience, competitors and positioning · Brand personality and voice · Naming and taglines

02 Advanced Illustrator — WK 4-6

Custom lettering and logotypes · Complex vector illustration · Pattern and texture design

03 Advanced Photoshop — WK 7-9

Photo compositing and perspective · Frequency separation and professional retouching · Colour grading and mood

04 Layout with InDesign — WK 10-12

Grids, baselines and columns · Master pages, styles and long documents · Brochures, catalogues and magazines

05 Packaging design — WK 13-14

Structure and dielines · Labels, boxes and bags · Materials, finishes and foils

06 Visual design in Figma — WK 15-16

Frames, auto layout and components · Design systems and styles · Social and web campaign visuals

07 Print production and prepress — WK 17

Colour management and proofing · Spot colours and special inks · Trapping, overprint and bleed

08 Client workflow and pricing — WK 18

Briefs, scope and revision rounds · Proposals, quotes and contracts · Pricing your time and your value

09 Capstone brand project — WK 19-20

Choose a real brand brief · Develop identity, applications and packaging · Assemble a case study

YOU FINISH WITH A REAL PROJECT

A complete brand project: identity and guidelines, packaging, a printed brochure or catalogue, and campaign visuals, presented as a portfolio case study.

INTERNSHIP **Brand design intern.** After the course, work with the team on real tasks, with feedback.

ADVANCED COURSE

COURSE 8 OF 9

Backend Development

The server side of real systems.

16 weeks	3 × 2 h	96 h	Included
ESTIMATED DURATION	CLASSES PER WEEK	HANDS-ON CLASS TIME	INTERNSHIP + CERTIFICATE

WHAT YOU WILL LEARN

- ✓ Design and build a REST API with validation and error handling.
- ✓ Model data and write queries in PostgreSQL.
- ✓ Implement authentication, roles and common security protections.
- ✓ Write tests and deploy a service with logs.
- ✓ Explain trade-offs in caching, performance and structure.

TOOLS YOU WILL USE

Node.js · Express · PostgreSQL · An ORM (Drizzle or Prisma) · Postman · Git · Docker (intro)

WHO IT IS FOR

People who can already write basic JavaScript and want to build what runs behind websites and apps: orders, users, payments and reports.

BEFORE YOU START

Basic JavaScript. If you have finished our Web Development course, you are ready.

WHERE IT LEADS

Backend developer (junior) · API developer · Database developer · Freelance backend developer

Your course, step by step

10 MODULES · EVERY ONE HAS A HANDS-ON LAB

01 Node.js and server JavaScript — WK 1–2

Running JavaScript outside the browser · Modules, packages and npm · The event loop, async code and promises

02 HTTP and REST APIs — WK 3–4

HTTP methods, status codes and headers · Designing resources and endpoints · Express routing and middleware

03 SQL and PostgreSQL — WK 5–7

Tables, keys and relationships · Normalisation, and when to bend it · SELECT, JOIN, GROUP BY and subqueries

04 ORMs and data access — WK 8

Why use an ORM, and its limits · Schema, relations and queries · Migrations in a team

05 Authentication and security — WK 9–10

Password hashing and storage · Sessions and tokens · Roles and permissions

06 Files, email and payments — WK 11

File uploads and storage · Sending email reliably · Webhooks

07 Testing — WK 12

Unit and integration tests · Testing endpoints and databases · Test data and isolation

08 Caching and performance — WK 13

Where time goes in a request · Caching strategies and Redis basics · Query optimisation

09 Deployment and operations — WK 14

Hosting options and environments · Docker basics · CI: running tests on every push

10 Capstone project — WK 15–16

Choose a real business system · Design the schema and API · Build, test and secure it

YOU FINISH WITH A REAL PROJECT

A production-style API for a real business system, with a PostgreSQL schema, authentication and roles, tests, a CI pipeline, and a deployed, documented service.

INTERNSHIP **Backend intern.** After the course, work with the team on real tasks, with feedback.

FEE AND NEXT BATCH

CERTIFICATE

Verify online: kataf.pk/verify

AL-KAUSAR
COMPUTER INSTITUTE

ADVANCED COURSE

COURSE 9 OF 9

Full Stack Development

The complete developer path, from zero to a deployed application.

32 weeks	4 × 2 h	256 h	Included
ESTIMATED DURATION	CLASSES PER WEEK	HANDS-ON CLASS TIME	INTERNSHIP + CERTIFICATE

WHAT YOU WILL LEARN

- ✓ Build a complete web application from interface to database.
- ✓ Use React and Next.js the way professional teams do.
- ✓ Design databases and secure APIs.
- ✓ Write tests and ship through a repeatable deployment process.
- ✓ Plan, build and present a product as a small team would.

TOOLS YOU WILL USE

HTML and CSS · JavaScript and TypeScript · React · Next.js · Node.js · PostgreSQL · Tailwind CSS · Git and GitHub

WHO IT IS FOR

Beginners who want one complete path to becoming a developer, and learners who want to build whole products as a freelancer or inside a company.

BEFORE YOU START

None. This is the longest path and it starts from zero.

WHERE IT LEADS

- Full stack developer (junior)
- Frontend or backend developer
- Freelance full stack developer
- Startup product developer

Your course, step by step

11 MODULES · EVERY ONE HAS A HANDS-ON LAB

01 Web foundations — WK 1-4

How the web works · Semantic HTML and forms · CSS: box model, Flexbox and Grid

02 JavaScript — WK 5-8

Variables, functions and scope · Arrays, objects and array methods · The DOM and events

03 TypeScript — WK 9-10

Types, interfaces and generics · Typing functions and data · Narrowing and unions

04 Git, GitHub and Tailwind — WK 11

Commits, branches and pull requests · Working in a team repository · Tailwind: utilities, variants and components

05 React — WK 12-16

Components, props and composition · State and effects · Hooks and custom hooks

06 Next.js — WK 17-20

Routing, layouts and pages · Server and client components · Data fetching and caching

07 Node.js and APIs — WK 21-23

Node and Express · REST design, validation and errors · Middleware

08 PostgreSQL and ORMs — WK 24-26

Tables, relations and keys · Queries, joins and indexes · Migrations and seed data

09 Authentication and security — WK 27-28

Registration, login and sessions · Roles and permissions · Protecting against common attacks

10 Testing and deployment — WK 29

Unit and end-to-end tests · Environment variables and configuration · CI and deployment

11 Capstone project — WK 30-32

Choose and scope a real business application · Design the data, API and screens · Build in weekly milestones

YOU FINISH WITH A REAL PROJECT

A deployed full stack business application, for example a small ERP, with logins and roles, a PostgreSQL database, an admin area, tests, and a final presentation.

INTERNSHIP **Full stack intern.** After the course, work with the team on real tasks, with feedback.

FEE AND NEXT BATCH
